

Do you install Hygienic WALL CLADDING?

YES: Then we have the adhesive & Sealants to help in all situations!

APPLICATION METHOD: Beading

An incredible, instant grab adhesive based on hybrid technology. It has initial bond strength double that of most other grab adhesives and bonds to vertical surfaces without slippage, eliminating the need for secondary support in the majority of applications. Can even be used on damp or wet surfaces, is solvent free and cures quickly. It is water, frost and heat resistant from temperatures of -40°C to +90°C

APPLICATION METHOD: Notched Trowel

OPTION 1: Apollo A6546 -

Specifically developed for a wide range of panel bonding applications, including fixing batons and wall panels directly onto vertical substrates without any mechanical fixings. It is a single component solvent-free water-based adhesive

OPTION 2: ECT 5002 -

A two-part PU Solvent Free adhesive consisting of an off-white coloured paste base and a dark brown liquid curing agent. Suitable when applying panels to non-porous surfaces.

Need to Seal around the edges?

Seal and Fix MSP:

Superior adhesion even to damp surfaces;

No shrinkage while curing;

Available in Tubes & Sausages;

Approved by SEGA to EN 1186 and EN 13130 and CEN/TS 14234, European standards for food preparation.

Zwalu Spectrum Seal:

LMN Silicone in a variety of RAL Colours

ACC 1502:

FDA Compliant

Silver grey – Stainless Coloured
