

# Technical Data Sheet

## Release Agent LP 305/98

**Product name:** LP305/98  
**Application:** Manual cleaning of plastic surfaces.  
 → Effortlessly removes glue residues

### Physical and chemical characteristics:

- Form: Fluid
- Colour: Colourless
- Smell: Characteristic
- Ignition temperature: Not determined  
Product is not self-igniting.
- Boiling range: > 78 °C
- Flash point: ~ 1 °C
- Values for explosion: Lower 0,7 Vol %  
Upper (lowest and highest value of the individual components)  
Product is not explosive.  
(formation of explosive air/steam mixtures is possible)
- Density: 0,753 g/cm<sup>3</sup> (at 20°C)
- Vapour pressure: 57 hPa (at 20°C)

**Composition:** Mixture of hydrocarbons and ethanol

**Available packaging (liter):** 1|30|200|1000

### Safety Instructions:

- Transport: Class 3, PG II
  - Customs tariff: 34029090
  - Storage: Keep container tightly closed. Store in a cool, dry place.
  - Shelf life: Unlimited shelf life when stored properly.
  - Disposal: According to official regulations, or returnable packaging
- 
- ✓ Strong cleaning power
  - ✓ Quick drying
  - ✓ Residue free evaporation
  - ✓ Low odour
  - ✓ Hexane free
  - ✓ Benzene free

All information in this document is based on current knowledge and experience. The user is not released from his own tests and trials. We accept no liability for damage resulting from improper use.
