

TECBOND LM44

technical datasheet

General description

Lowmelt, fast setting, high performance, white adhesive, suitable for use on expanded polystyrene, thin films and balloons

TECBOND LM44 is a high performance adhesive formulated for application at low temperature (130-160°C). It is suitable for use on temperature sensitive materials that would be damaged by normal hotmelt temperatures. The lower application temperature reduces the risk of accidental burns making it suitable for use in schools and for applications that require fingers to be close to the adhesive during assembly.

This is a fast setting adhesive that can be used for box and carton closing,

Technical characteristics

Adhesive type:	Synthetic polymer based hotmelt		
Colour:	White		
Molten tack:	High		

	12mm	15mm	43mm	СТ	Bulk
Form	12mm x 200mm		43mm x 43mm		
Sticks per kilo (approx)	50		17		
Carton quantity	5kg		10kg		
Pallet weight:	500kg		500kg		
Suggested application temperature	130-160°C		130-160°C		
Brookfield viscosity (POW-12-VISC) spindle 27	1400cps		1400cps		
Ring & ball softening point (ASTM E28)	98°C		98°C		
Heat resistance (BS5350 Part H3)	75°C		75°C		
Open time	Short		Short		
Low temperature flexibility (tg)	-10°C		-10°C
