Tecbond 214B

BASED ON OUR BEST-SELLING
PACKAGING ADHESIVE

Why choose tecbond 214B?

- Biodegradable packaging adhesive.
- Non-toxic, made using 44% bio-based materials.
- High quality packaging adhesive suitable for use on cardboard and paper substrates.
- Available in 12, 15 and 43mm sizes to suit any size tec glue gun.
- Tecbond 214B is certified to ASTM D6400, EN13432, ASTM D6954 and ASTM D6866 standards.

How tecbond 214B works

- Breakdown process begins upon exposure to oxygen, UV light and heat – all naturally occurring environmental conditions.
- The long-chain polymers are broken down, allowing the material to eventually be consumed by micro-organisms.
- The process leaves behind only non-harmful products – no microplastics.
- *Tested in industrial composting conditions.

How to store and use

Keep adhesive in original packaging, away from direct sunlight and store below 30°C until ready to use.

Only take the adhesive you require to avoid unnecessary exposure.

Load and apply adhesive as normal.

Any glue left in the applicator should be purged after approximately 24 hours**.

We recommend not using tecbond 214B beyond 24 months of the date of manufacture.

**Simply feed a fresh stick into the applicator and dispense until you are confident the previous stick has been expelled.
